

Contemporary decorative insect control

Developed as contemporary and discreet solution for insect control, Satalite is ideal for use in restaurants, bars, cafes and other front of house applications. Satalite is proven to be more effective than standard decorative flykillers and incorporates patented technology which ensures all of the glueboard is fully utilised. The glueboard is positioned equidistantly from the tube ensuring there are no areas of glue too far from the tube to be effective. Available as an 18 or 30W unit, Satalite can be mounted either vertically or horizontally and both units are designed for use with genuine GLUPAC™ pheromone impregnated glueboards, which incorporate UV stable dry glue for longer life and an increased catch.

Features

Stylish and effective insect control

Ideal for front of house applications

Flexible and easy installation

Horizontal or vertical mounting

Patented glueboard positioning

Proven to be more effective at catching flies

High efficacy UV tubes

Proven to be more effective and longer lasting than standard UV tubes
